Rule 30: Expect Exceeded Expectations

List each team member and reflect on the current roles they perform well now- list these in the middle column next to their name. In the third column list a role or task you'd give them if they had 10x the capacity you were currently tapping in to.

Name:	Current Capacity (things they do well now)	10x more capacity (new responsibility)

Reflection:

What new roles/tasks might you offer individual members of your team? How would you benefit? How would you like the team to benefit? How would the organization benefit? What are the risks to consider?
