The definitive new book on creating community everywhere

by Peter Block

Building the social fabric of our communities

The various sectors of our communities—businesses, schools, social service organizations, churches, government—are too often at odds with each other and exist in their own worlds. As do so many individual citizens who long for connection, but end up marginalized, their gifts overlooked, their potential contributions lost. This disconnection and detachment makes it hard, if not impossible, to envision a common future, one that is distinct from the past.

The methodology of communal transformation

In this inspiring new book Block provides an exploration of precisely how community transformation occurs. It involves the power of the small group, a shift in the way we gather, the creation of a new conversation, and rethinking the role of leadership. It develops when we change our focus from problems to possibilities—and from deficiencies to gifts. *Community* is written in a way that makes the ideas and practices very accessible. At its core, it offers a way of thinking about our places that creates an opening for authentic communities to exist and details what each of us can do to make that happen.
